TECNAM Sales Record at the AERO 2009 in Friedrichshafen – Germany

NAPLES, Italy/April 8, 2009 - **TECNAM “Quality Aircraft since 1948”**

The company sold **aircraft to the value of 2.5 million Euros** during the AERO 2009 show in Friedrichshafen,

TECNAM exhibited The **P2006T** (Twin-Engine); The **P2002 JF** (VLA-Certified, Single Engine); The **P92 Echo Classic De Luxe** (Single Engine); The **P2002 SIERRA De Luxe** (Single Engine) and **TECNAM’s New Model, the P2008**

➤ The **P2008** is a two-seat, high wing airplane with a carbon fiber fuselage and metal wings and stabilator. The decision to utilize both materials allows for the optimization of aerodynamic qualities and reliability. Carbon fiber provides smooth surfaces, elegance, style, comfort and aerodynamic qualities for the fuselage and metal is used for the wing and stabilator for strength and reliability.

“We are aware that the Aviation Market has not been immune from the Economic Downturn which has resulted in a Major Restructuring of Several Manufacturers as dramatically lower sales impact on the business, but TECNAM is ready to face this situation with their Sales Network Compromise, with its Price/Quality and with its background of Sixty (60) Years in Aviation; and it was demonstrated at the AERO 2009”, said Mr. Paolo Pascale C.E.O. of TECNAM.

About TECNAM “Quality Aircraft since 1948”

TECNAM traces its roots back to the activities of the brothers Luigi and Giovanni Pascale, who developed soon after the end of WWII (1948) and have continued ever since to maintain in the field of General Aviation with the creation of original models that gained worldwide recognition under the name Partenavia. Establish in March 1986, Costruzioni Aeronautiche TECNAM now operates in three plants with more than 78.804 sq ft of area. The Casoria facility is located adjacent to the Napoli Capodichino Airport. The Capua facility is located adjacent to the “Oreste Salmone” Airport. And finally the TECNAM Spain facility located in Villanueva del Gallego, Zaragoza – Spain. Modern reinforced concrete buildings are used for manufacturing processes, design activities and office administration.
